# On the Subject of Keep Clicking

"Oh, this is keypads!" No, not really. Good luck.

Each of the six buttons will have a symbol. Clicking a button changes its symbol. For every button, do the following:

1. Identify the type of the button as follows:

   a. If the button is in the top row and there are more than 2 batteries on the bomb, it is a pN button.
   b. Otherwise, if the button is in the bottom row and there is a lit indicator with label SIG, it is an aK button.
   c. Otherwise, if there is a vowel in the serial number, it is a pN button.
   d. Otherwise, it is a gX button.

2. Click the button until it displays any of the valid stop symbols for that button:

Type	Stop when Button Shows:						
aK Button:	♓	♈	♊	♃	σ	ω	♊
pN Button:	♌	♌	♑	ö	♋	♏	♎
gX Button:	♍	♑	♏	♉	♒	♏	♐

3. Once all buttons show a valid stop symbol, click the submit button.
